Summary Tables of Particle Properties

Stable particles 13
Addendum 24
Search limits 25
Mesons 28
Baryons 38
Tests of conservation laws (rev.) 45

Miscellaneous Tables, Figures, and Formulae

Physical constants (rev.) 51
Astrophysical constants (rev.) 52
Big bang cosmology 52
International System (SI) nomenclature (new) 53
Commonly used metric prefixes (new) 53
Atomic and nuclear properties of materials (rev.) 54
Periodic table of the elements (rev.) 56
Electronic structure of the elements 57
High-energy collider parameters (rev.) 58
Cosmic ray fluxes 61
Particle detectors (rev.) 61
Passage of particles through matter (rev.) 64
Mean range and energy loss plots 68
Photon and electron attenuation plots (rev.) 70
Commonly used radioactive sources (rev.) 73
Radioactivity and radiation protection (rev.) 73
Probability, statistics, and Monte Carlo (rev.) 74
Electromagnetic relations (rev.) 84
Clebsch-Gordan coefficients, spherical harmonics, and d functions 86
SU(3) isoscalar factors and representation matrices (rev.) 87
SU(n) multiplets and Young diagrams 88
C.M. energy and momentum vs. beam momentum 89
Kinematics (rev.) 90
Cross-section formulae for specific processes (rev.) 93
Quantum chromodynamics (rev.) 96
Standard model of electroweak interactions (rev.) 102
Kobayashi-Maskawa mixing matrix (rev.) 107
Quark model (rev.) 109
Monte Carlo particle numbering scheme (new) 113
Plots of cross sections and related quantities (rev.) 115

Full Listings

Illustrative key to the Full Listings 129
Abbreviations used in the Full Listings 130

Stable particles
Gauge bosons (γ, W, Z) 134
Leptons (ν, e, μ, τ; lepton searches) 136
Mesons (π, η, K, D, D_s, D_s^*, B, B^*) 165
Baryons (p, n, Λ, Σ, Ξ, Ω, Λ_c, Ξ_c, Ω_c, Λ_b) 222
Searches 246

Meson resonances
$S = 0$ (π, η, b, h, ρ, ω, ϕ, a, f, χ, ψ, Υ) 269
$S = \pm 1$ (K, K^*) 345
Charmed, nonstrange meson (D^*) 361

Baryon resonances
$S = 0$ (N, Δ) 366
$S = +1$ (Z_0, Z_1) 417
$S = -1$ (Λ, Σ) 417
$S = -2$ (Ξ) 463
$S = -3$ (Ω) 470
Charmed baryon (Σ_c) 471
Dibaryons (NN, ΛN) 472

Other Compilations of Interest to Particle Physicists 477

Accessing and Using Particle Physics Databases 478
